✦ THE HONEST GA VALUATION TOOL

KNOW WHAT YOUR PLANE IS WORTH.

Real asking price ranges for piston singles, twins, LSA,
and experimental aircraft — with transparent discount
bands, not fabricated sale prices.

WHY SMALLPLANEVALUE

BUILT FOR GA, NOT JET BROKERS.

Vref and Aircraft Bluebook focus on larger turbine aircraft. We built the tool that actually works for piston singles, twins, LSA, and experimental aircraft — the planes most pilots actually fly.

No fabricated sale prices

Unlike real estate, GA aircraft sale prices aren't publicly recorded. We're honest about that — we show asking price ranges with transparent negotiation bands instead of making numbers up.

Aircraft-specific intelligence

Our AI knows the difference between a 1979 Cherokee 180 and a 2007 SR22T. Model-specific ADs, known issues, and avionics premiums are all factored in.

The full buyer workflow

Look up the N-number, get the valuation, run the pre-buy checklist, then use flagged issues to negotiate. One site, the complete process.

HOW IT WORKS

FROM N-NUMBER TO NEGOTIATING POSITION.

01

Look up the N-number

Enter any US registration and pull the full FAA record — make, model, year, engine, and ownership history in seconds.

02

Get the valuation

See the typical asking price range for that aircraft, the likely negotiated price, and what's driving value up or down.

03

Run the pre-buy checklist

Get an AI-generated inspection checklist specific to that make and model. Mark items pass, flag, or fail.

04

Negotiate with confidence

Flagged issues feed back into a price adjustment analysis, so you walk in knowing exactly what to ask for.

THE TOOLKIT

EVERYTHING IN ONE PLACE.

Five integrated tools that cover the entire aircraft buying and selling process.

STEP 2

AI valuation

Enter make, model, year, time, condition, and avionics. Get asking price range, likely sale range, and factor-by-factor analysis.

STEP 1

N-number lookup

One N-number pulls the full FAA record — make, model, ownership history, ADs, registration expiry, and buyer flags.

STEP 3

Pre-buy checklist

AI-generated inspection checklist specific to your aircraft type. Track pass, flag, and fail items. Get price adjustment guidance.

REFERENCE

Market listings

See current asking price ranges for any model — low, median, and high — plus days on market and negotiation context.

COMMUNITY

Report a sale

Submit what you actually paid (or sold for). Anonymous crowd-sourced data that builds the transaction database nobody else has.

COVERAGE

BUILT FOR THE PLANES

PEOPLE ACTUALLY FLY.

We cover the full spectrum of general aviation — from first trainers to high-performance experimentals.

Piston singles

Piston twins

Experimental / Homebuilt

Light Sport (LSA)

Turboprop singles

Vintage / Warbird

A note on GA aircraft valuations

Unlike real estate, GA aircraft sale prices are not publicly recorded anywhere. SmallPlaneValue.com shows asking price ranges pulled from active listings (Trade-A-Plane, Controller, Barnstormers) paired with category-specific discount bands that represent typical negotiated outcomes — based on broker experience, not verified transactions. We believe being honest about this is more useful than showing made-up "sale prices."
